

January 8, 2018

The Honorable Rodney Frelinghuysen
Chairman
Appropriations Committee
U.S. House of Representatives
Washington, DC 20515

The Honorable Nita Lowey
Ranking Member
Appropriations Committee
U.S. House of Representatives
Washington, DC 20515

The Honorable Tom Cole
Chairman
Appropriations Subcommittee on Labor,
Health and Human Services, Education and
Related Agencies
U.S. House of Representatives
Washington, D.C. 20515

The Honorable Rosa DeLauro
Ranking Member
Appropriations Subcommittee on Labor,
Health and Human Services, Education and
Related Agencies
U.S. House of Representatives
Washington, D.C. 20515

Dear Chairman Frelinghuysen, Ranking Member Lowey, Chairman Cole, and Ranking Member DeLauro:

As you and your colleagues prepare to negotiate a final spending bill for fiscal year (FY) 2018, the 150 undersigned organizations respectfully request that you fund the Agency for Healthcare Research and Quality (AHRQ) at a level equal to or higher than the Senate mark of \$324 million. AHRQ is an essential element of the nation's health care ecosystem, charged with improving the quality and delivery of health care.

Discovering cures is critical to patients, providers, and our communities. However, understanding how to most effectively deliver those cures to patients through health services requires research that is equally critical. AHRQ is the only federal agency whose sole focus is to generate reliable research on how to deliver the highest quality care, at the greatest value, with the best outcomes to all patients. It is the only agency that funds research on the “real-world” patient—the one who doesn't have diabetes alone, for example, but also has cardiovascular disease and renal disease; or the patient who has cancer, as well as heart disease. AHRQ-funded research allows us to understand where waste, inefficiencies, and gaps exist within the health care system, and allows patients, payers, providers, and others to harness American innovation and make the health care system safer, more efficient, and more effective.

Today, AHRQ is helping doctors in rural communities fight the opioid epidemic by developing and testing effective medication assisted therapy protocols that could save thousands of lives, something of particular importance as we fight the current opioid epidemic. AHRQ is also providing primary care clinicians and their patients with tools to make evidence-based decisions about which medications to use for treating alcohol use disorder. AHRQ is the federal agency singularly responsible for reducing the nearly 100,000 deaths in the United States each year associated with medical errors and is supporting researchers who continue to search for ways improve patient safety and outcomes.

While \$324 million does not restore AHRQ's budget to its previous funding levels or allow for critical initiatives that were terminated as a result of the cuts to return, it will ensure that the agency can continue its critical mission. Additional cuts to AHRQ will result in the loss of life and cost saving research as was seen in FY 2016, where promising research projects were eliminated. Among those was the agency's research portfolio to optimize care for America's nearly 60 million patients living with multiple chronic conditions. By 2020, an estimated eighty-one million people will have multiple chronic conditions and the costs of their care will consume 80 percent of publicly funded health insurance programs such as Medicare and Medicaid. This research portfolio – maintained solely by AHRQ – was the only source of such information on how to most successfully and cost efficiently treat these patients.

Health services research shows that as much as one-third of the more than \$3 trillion our nation spends on health care each year is waste—care that is inappropriate, ineffective, or harmful. Every dollar we invest in generating evidence to eliminate that waste is a sound fiscal investment. Funding AHRQ will help to ensure that our health care system becomes the most efficient one in the world for both patients and taxpayers. We urge you to make maintaining funding for AHRQ, and its critical research, a priority in the FY 2018 omnibus.

Sincerely,
