Application of Systems Science Approaches to Investigation of Complex Health Challenges

Resource List

AcademyHealth has been fostering the use of systems science methodologies to address complex social, behavioral, and environmental factors that influence health. While the field of health services and policy research has contributed a vast evidence base, systems science has not been used to its full potential to address systems-level challenges and inform changes to the nation’s health system. This list provides an introduction to key resources that describe the application of systems science methodologies to complex health challenges.
